

D3Times

An interactive look at health risks facing particular demographics by each state.

In this Data Driven Document (D3), we explore certain associations between demographics and behavioral risk factors using survey data collected from the American Community Survey (ACS) and the Behavioral Risk Factor Surveillance System (BRFSS) during the year 2014. Each marker represents an individual U.S. state. Click on any of the axis titles to start exploring

Click on any x-axis label to change the display.
